The responsibility for the contents of the chapters in the book belongs to the authors. In accordance with the publication provisions of Intellectual and Artistic Works No. 5846 and 2936, no part, image, or text may be reproduced, published, copied, photocopied, or otherwise processed in any way that could constitute a copy without the permission of the authors and publisher. Medical information is constantly changing and updated. Standard safety practices must be observed. In light of new research and clinical experience, changes to treatments and drug administration may be necessary. Readers are advised to always check the latest information provided by the manufacturer regarding medications. Dosage, administration methods, and contraindications should be constantly monitored in light of current information. Determining the best treatment method, most appropriate medications, and dosages for each patient is the responsibility of the administering physician. The publisher and editors are not responsible for any harm or damage to patients or equipment that may occur as a result of this publication.

Medicines Acting on the Cardiovascular System

Section Editor: *Safa Dönmez*

Chapter 1. Drugs Used in Cardioversion and Defibrillation.....	1-8
<i>Mert Vural</i>	
Chapter 2. Inotropic, Chronotropic and Dromotropic Drugs.....	9-16
<i>Nazım Onur Can</i>	
Chapter 3. Antiarrhythmic Drugs in Emergency Medicine.....	17-32
<i>Gökçe Yolcu</i>	
Chapter 4. Antihypertensives.....	33-54
<i>Mevlana Gül</i>	
Chapter 5. Diuretics.....	55-66
<i>Engin Kurt, Nezahat Kurt</i>	
Chapter 6. Anticoagulant and Antithrombotic Medicines.....	67-72
<i>Ahmet Şenol</i>	

Section 2

Effective on the Respiratory System

Section Editor: *Alp Şener*

Chapter 7. Oxygen Therapy and Noninvasive Application Methods.....	73-84
<i>Kadir Yenal</i>	
Chapter 8. Medications Used in the Management of COPD and Asthma Patients in the Emergency Department.....	85-104
<i>Ahmet Celal Özsoy, Hüseyin Avni Demir</i>	
Chapter 9. Medications Used in Anaphylaxis and Severe Allergic Reactions.....	105-126
<i>Furkan Polat</i>	
Chapter 10. Medications Used in Pulmonary Embolism and Thromboembolic Diseases.....	127-160
<i>Tuba İnal Cengiz</i>	
Chapter 11. Pharmacological Approaches in ARDS and Critical Hypoxemia.....	161-170
<i>Reyhan İrem Mutlu Eren</i>	
Chapter 12. Supportive and Symptomatic Drugs.....	171-182
<i>Ahmet Coşkun</i>	

Section
3

Antibiotics and Analgesics
Section Editor: Burak Katipoğlu

Chapter 13. Penicillins and Cephalosporins.....183-210
Tuba Şafak

Chapter 14. Macrolides, Quinolones and Anaerobic Antibiotics.....211-230
Rabia Handan Günsay

Chapter 15. Carbapenems, Vancomycin, and Teicoplanin.....231-254
Emine Sarcan

Chapter 16. Nonsteroidal Analgesics.....255-268
Burhaneddin Burak Yurt

Chapter 17. Local Anesthetics and Opiates.....269-282
İlker Şirin

Medicines Used in the Emergency Department and Dosage Guide

Preface

Emergency departments represent one of the most dynamic settings in modern medicine, where the most critical decisions are made. In this environment, clinical success depends not only on theoretical knowledge but also on the ability to make rapid, accurate, and evidence-based pharmacological decisions. In this context, drug selection, dose adjustment, and administration strategies are among the fundamental factors that directly influence patient outcomes.

This work, titled *Medicines Used in the Emergency Department and Dosage Guide*, has been prepared with the aim of presenting, in a systematic and comprehensive manner, the pharmacological properties, clinical indications, and particularly the dosing approaches specific to emergency department practice for medications frequently used in emergency medicine. The book not only conveys theoretical knowledge but also aspires to serve as a practical and applicable guide that supports clinical decision-making processes.

One of the most distinctive features of this work is the adoption of a structured and standardized section format for each medication. The sections are systematically organized under headings such as introduction, pharmacodynamic and pharmacokinetic properties, general and emergency department-specific indications, detailed dosing protocols, use in special patient populations, adverse effects, toxicity management, and clinical pearls. In particular, emergency department indications and disease-specific dosing strategies are presented in detail in accordance with current guidelines and evidence-based approaches.

Considering that time is limited and decisions are critical in emergency medicine practice, the aim of this book is to provide physicians, residents, and healthcare professionals with a fast-access, reliable, and practical reference source. At the same time, this work seeks to contribute to the academic literature and to become a reference resource at the international level through the presentation of standardized information.

We would like to thank all the chapter authors who contributed to the preparation of this book for their scientific input and meticulous work. Each chapter has been prepared by experienced academics in their respective fields, in light of current literature and clinical experience.

Prof. Dr. Cemil KAVALCI and the Editorial Board
